Kurze Projektbeschreibung:

This project focuses on the interconnection between music and culture in the English-speaking world. We are going to analyse how these two entities interact and influence each other over time. Therefore we are going to take a closer look at American black music culture from its traditional heritage in Africa, its development in the Carribean and its contemporary range of influence. Moreover, analysing the Punk movement in Britain is part of this project. To enhance your knowledge, we are going to visit the new MOMEM in Frankfurt and watch different music documentaries. Students are free to make their own suggestions and are going to be provided with enough time to work on their own projects. The main language in this project is English!
